REISSUE APPLICATION DECLARATION BY THE INVENTOR

Docket Number (Optional)

54317-011902

As a below named inventor, I hereby declare that:

My residence, mailing address and citizenship are stated below next to my name.

I believe I am the original, first and sole inventor (if only one name is listed below) or an original, first and joint inventor (if plural names are listed below) of the subject matter which is described and claimed

in patent number 5,905,865, granted May 18, 1999, and for which a
reissue patent is sought on the invention entitled APPARATUS AND METHOD OF AUTOMATICALLY
ACCESSING ON-LINE SERVICES IN RESPONSE TO BROADCAST OF ON-LINE ADDRESSES

the specification of which

☒ is attached hereto.

☐ was filed on _____ as reissue application number _____
and was amended on _____
(If applicable)

I have reviewed and understand the contents of the above identified specification, including the claims,
as amended by any amendment referred to above.

I acknowledge the duty to disclose information which is material to patentability as defined in
37 CFR 1.56.

I verily believe the original patent to be wholly or partly inoperative or invalid, for the reasons described
below. (Check all boxes that apply.)

☐ by reason of a defective specification or drawing.

☒ by reason of the patentee claiming more or less than he had the right to claim in the patent.

☐ by reason of other errors.

At least one error upon which reissue is based is described below. If the reissue is a broadening
reissue, such must be stated with an explanation as to the nature of the broadening:

Applicants' original claim 1 contained step c) and step d) which collectively identified the
use of an address transmitter for receiving (step c) and transmitting (step d) an address
from a third location. These steps are not necessary to patentably define the invention
over the prior art. As such, the Applicants are defining the invention as providing for
coordinating transmission of an address identifying corresponding on-line content and
broadcasting of a television program content. Support for this feature is found, for
instance, in the provisional application No. 60/000,811 which is incorporated by
reference in U.S. Patent No. 5,905,865 and the reissue applications. Claims 2 to 38 are
being cancelled. Additionally, the reissue application 09/860,259 had an error in not
claiming more than there is the right to claim.
